## FEATURES

### Advanced security

eero Plus is updated every second to protect you from millions of malicious websites that host viruses, phishing scams, ransomware, and more.

### Content filtering

A simple way to prevent or block certain devices from accessing violent, illegal, or adult material from specific devices on the network.

### SafeSearch

An easy tool for blocking violent content from Google and Bing search results across all your children's devices.

### VIP support

eero Plus provides priority access to our customer experience team, so you'll have limited or no wait time before speaking with a WiFi expert.

## HOW ADVANCED SECURITY WORKS

-  eero Plus prevents you, or anyone on your network, from accessing malicious sites associated with viruses, malware, phishing scams, and more.
-  Unlike the built-in protections in your browser or email client, eero Plus references a database of threats that is automatically updated every second.
-  If you visit a site we're not familiar with, or a site that's flagged as suspicious, eero Plus will test it in real time to confirm it's safe before letting you access it.
-  With eero Plus, you don't have to manually set up protections on each device; all laptops, phones, and connected devices are secure with just a few taps.

## PRICE

\$9.99 per month or \$99 for a full year
